EXECUTIVE SUMMARY

Fresh Graduate in Informatics with hands-on experience in Android Development (Kotlin, Jetpack Compose), Artificial Intelligence, and Full-Stack projects. Skilled in cross-functional collaboration, problem-solving, and delivering measurable results. Passionate about creating impactful technology solutions with proven achievements in academic, organizational, and professional settings.

EDUCATION

Bachelor's Degree in Informatics, Universitas Sebelas Maret 2021 - 2025

- **GPA: 3.89**
- Relevant Coursework: *Android Development, Artificial Intelligence, Software Engineering, Object Oriented Programming (OOP), Database, Data Structure and Algorithms*

WORK EXPERIENCES

Direktorat Teknologi Informasi dan Komunikasi (DTIK) UNS October 2023 – December 2024
Software Developer Intern

- Documented technical specifications and user guides for 2 academic websites.
- Collaborated with 3 staff to improve development workflow and website usability.

Universitas Sebelas Maret February 2024 – June 2024
Teaching Assistant for Android Development

- Mentored 50+ students on Android (Kotlin, Android Studio) covering layouts, fragments, and data persistence.
- Provided feedback for 150+ assignments, improving student project quality and completion rate.

PROJECTS

White Blood Cell Segmentation using U-Net with ResNet34, Hybrid Gated Attention, and SE Block 2025

Bachelor's Thesis – Final Year Project

- Implemented a semantic segmentation model to segment white blood cells in Acute Myeloid Leukemia (AML) images.
- Utilized UNet with ResNet34 backbone, Hybrid Gated Attention, and Squeeze-and-Excitation, improving segmentation performance.
- Processed 100+ high-resolution images through resizing to enhance training efficiency.
- Achieved 96.06% Dice Score, improved overlapping cell segmentation by 5.05% compared to DeepLabv3+, and awarded Grade A for the thesis project.

Bersih.Kan: A Comprehensive Platform for Efficient Waste Management Solutions 2023
Capstone Project of Bangkit Academy 2023 Batch 2

- Designed UI/UX with 10+ screens and developed Android app using Jetpack Compose.
- Integrated external API and Machine Learning model for real-time waste classification.
- Collaborated with 6 team members and selected as Top 50 Product-Based Capstone Projects out of 500+ teams.

Plant Recommendation Model using Support Vector Machine and Artificial Bee Colony 2023
Project of Pekan Kreativitas Mahasiswa (PKM)

- Designed and implemented a recommendation system to suggest suitable plants based on soil and environmental attributes.

- Applied Support Vector Machine (SVM) for classification and optimized parameters using Artificial Bee Colony (ABC) algorithm, achieving +1.02% accuracy over baseline.
- Collaborated with 4 team members and awarded PKM Insentif by the Ministry of Education, Culture, Research, and Technology.

Web-Based E-Canteen Application Design Klik-EAT! UNS

2023

Final Project of Software Engineering Coursework

- Analysed website requirements, designed the database, and created a 30+ page Software Requirement Specification (SRS) in collaboration with 2 team members.
- Developed 10+ responsive web pages (HTML, CSS, Bootstrap) and built the back-end with PHP & JavaScript for dynamic features.
- Co-authored a Software Design Description (SDD) with teammates and published 1 journal article based on the project.

ORGANIZATIONAL AND COMMITTEE EXPERIENCES

HIMASTER UNS

February 2022 – December 2022

Staff at Media & Information Division

- Produced 5+ social media contents & graduation materials for the organization.
- Delivered all content-related tasks consistently and on schedule.

PINGFEST 2022

March 2022 – November 2022

Coordinator of Media & Information Division

- Led 10-member team to deliver digital content & event promotion on schedule.
- Improved team workflow to ensure all sub-division and cross-division requests were delivered on time.

TRAININGS AND CERTIFICATIONS

- **Dev Certification for Android (DCA)**, by Dicoding, 2024
- **Android Development Cohort at Bangkit Academy**, by Google, GoTo, and Traveloka, 2023
- **Python Coding Bootcamp**, by Progate, 2021

SKILLS

Language: Indonesian (Native), English (Intermediate)

Programming Language: Kotlin, Java, Python, PHP, C/C++

Frameworks & Tools: Jetpack Compose, Android Studio, Bootstrap, PyTorch

Design Tools: Figma, Adobe Illustrator

Other: Microsoft Office, Visual Studio Code
